DRAGON® NATURALLYSPEAKING CERTIFIED BY NUANCE
★★★★★
Maximum Accuracy Dictation

Maximize the Power of Speech with the introduction of the latest ODMS

Olympus dictation devices achieve the highest Nuance Dragon Score and together with Olympus Dictation Management Software (ODMS) R6.3.1 seamlessly integrates with Dragon Naturally Speaking making document creation easier and faster than ever.

Get the most from Speech Recognition by upgrading to the ODMS R6.3.1.

Additional Dragon Commands are supported

ODMS R6.3.1 now supports more DNS commands which can easily be configured via the device settings.

Easy access to third party programs

During real-time speech recognition, you can easily access Microsoft Word, Excel, and Outlook from within the redesigned VR Editor window in ODMS.

Auto fill-in function for fields on voice recognition template

Support predefined fields for templates when doing Real-time Voice Recognition, Background Voice Recognition, and corrections on Text Correction Window.

Improved Templates Selection

Now the user has the ability to change template selection regardless of Author/Worktype ID after the VR editor window is opened.
