

MedTemps EMR

POWERFUL but Easy-To-Use EMR. If you know MS Word, you can use this. \$599 or \$499 with Dragon Naturally Speaking. [CLICK HERE To Watch DEMO](#) MedTemps 5.X is designed for use with Office Word 2003, Office Word 2007 & Office Word 2010. Compatible with Windows XP, Windows Vista and Windows 7 using Microsoft .NET technologies. New! MedTemps Ribbon (Toolbar) in Office 2007 for easy program access. The MedTemps© Electronic Medical Records (EMR) offers a seamless integration with client-based speech recognition. Solutions are highly tailored through utilizing specialty-specific speech recognition language models authored and continuously upgraded by Trigram Technology. Intuitive and flexible front-end customization is possible as a result of the solution being grounded in Microsoft Word 2003, Microsoft Word 2007, or Microsoft Word 2010. Back-end database integrity is afforded via Microsoft SQL Server. Established interfacing exists between the solution and SQL based practice management software. MedTemps© gives physicians an easy way to track clinical information and quickly create documents from a patient's record. With MedTemps© you can create SOAP notes, referral letters, H & P reports and even scan documents right into the system. You can create any type of medical report and save it to a secure HIPAA-compliant database directly from Microsoft Word. You can also store patient Family History, Social History, Medications, Problem List, Allergies and general notes in the database for use in any report or to reference in seconds! Combine MedTemps with your favorite speech recognition program and a Trigram Technology medical language model and you will be creating documents in minutes and eliminating transcription costs!

Speed

MedTemps users can document more rapidly and certainly can produce charts more rapidly compared to those using traditional transcription. Turnaround time is instantaneous expediting communications with referring physicians, sub specialists, and other members of your staff. Money Tremendous cost savings compared to traditional transcription. Less expensive than the vast majority of EMR products on the market. ROI is 30 days or less. Significant reduction in staff time devoted to pulling and re-filing charts; therefore leading to additional cost savings. Stability & Scalability MedTemps is grounded in Microsoft Word, and the vast majority of the world agrees that Microsoft is not going away. Microsoft enhancements to Word means that the same enhancements are available for use in MedTemps. MedTemps can utilize Microsoft Access or Microsoft SQL databases to accommodate any size practice. Regulatory compliance HIPAA compliant and secure data. Reduced Medical-Legal Exposure Complete, readable, defensible medical records. Quality of Care Rapid communications with associates and other health care professionals; therefore, tremendously enhancing the ability to deliver care in a timely fashion and avoid traditional delays. Readable medical records drastically reduces the chances for errors due to a handwritten note being misinterpreted. * Version 4.x Features * Product Feature MedTemps 3.x Office XP/2003 MedTemps 4.x for Office 2003 MedTemps 4.x for Office 2007 Create 12 custom fields to store patient data
