

## Difference Between Full Medical and Small Practice Edition

One of our most frequently asked questions concerning the Medical versions of Dragon Naturally Speaking is: What's the Difference between the Full Medical Version and the Small Practice Edition (SPE)? A very valid question, so we have included a breakdown of the main differences. I find that the most important differences are that the Small Practice Edition does not include the Radiology or Pathology Vocabularies and that it does not support a Citrix Network.

### Feature

Full Medical

Medical Small

### Practice

Pathology and radiology vocabularies included

Pathology and radiology vocabularies included among the nearly 80 specialty vocabularies provided.

Yes

No

Use in Citrix environment

Use in Citrix environment on machines not ordinarily capable of running Dragon

Yes

No

"Push" install capacity

Install to multiple machines at once

Yes

No

Roaming user capacity

Have your voicefiles available on any machine in the network.

Yes

Yes

EMR support

Medical professionals can navigate and dictate inside 3rd-party

EMR application software

Yes

Yes

Hidden mode

Users can dictate while reviewing lab or radiology test results and save when finished anywhere in the EMR

Yes

No

Improved Auto-Transcription

The Auto-Transcribe Folder Agent now creates a synchronized audio file along with the automatic transcript for deferred correction

Yes

Yes
